

Subject: Urgent: Pricing Discrepancies in the HBCS Project

Good Morning Core Team,

I hope this message finds you well. In the course of our monthly financial review, I have conducted a thorough analysis of the ongoing HBCS project and uncovered several significant discrepancies that require our immediate attention.

The primary concern revolves around the project's pricing structure. It has come to my attention that the current quoted price is substantially higher than what was initially agreed upon during the 13th instalment. This deviation not only poses challenges to our budget but also raises concerns about the viability of the project moving forward.

If these discrepancies are not addressed promptly, we face a critical deadline of three months to resolve these issues. Should we fail to do so, the project may encounter serious setbacks, ultimately hindering our ability to proceed with planned work. This situation could have broader implications for our commitments to stakeholders and clients who expect timely delivery.

To effectively address this matter, I kindly request your assistance in reaching out to the development heads of the HBCS project. Collaborating with them to clarify and resolve these pricing issues is essential to maintaining the integrity and progress of the project.

Thank you for your immediate attention to this important issue. I look forward to your support in ensuring a swift resolution.

Best regards,

Akshaya
